■ Precautions

1. Please ensure that the cable is properly connected to the lighting fixture before energizing the cable. It is strictly prohibited to plug in the cable before connecting it to the lighting fixture. Otherwise, there is a risk of electric shock.
2. When the light fixtures are in operation or not powered off, please do not touch the input port, otherwise there is a risk of electric shock.
3. Do not place the lighting fixtures in unstable locations. (Instability poses a risk of toppling and causing injury)
4. Warning: To prevent incidents that pose a threat to personal safety, such as broken or falling lighting fixtures, electric shock, and fire.
Please strictly follow the instructions for installation and use, and refrain from making unauthorized modifications or replacing parts and accessories.
5. Do not use a power source with a voltage exceeding the rated voltage range. Prolonged use outside the rated voltage range may damage the lighting fixture.
6. Light fixtures must not be connected in series with other electrical appliances, and they cannot be used in parallel with dimmers.
7. When inspecting/repairing lighting fixtures, please entrust it to professionals for operation. (Non-professionals are prone to encountering danger)
